

The first transmission will be a Mega Healing and Enlightenment Session to clear, transmute, heal, release and dissolve any self sabotage, resistance or blocks each of us may have around being fully open to receive and benefit from this series of healing transmissions.

The second transmission will be a Mega Healing and Enlightenment Session to deactivate, let go of and disconnect us from any and all morphogenic fields we may be corded into that energetically support, reinforce, enhance or anchor energetic weaknesses and imbalances in and associated with the pancreas, insulin and blood sugar levels.

The third transmission will be a Mega Healing and Enlightenment Session to align our pancreas, insulin and blood sugar levels with the divine ideal blueprints for optimal health and well being on all levels.

The fourth transmission will be a Mega Healing and Enlightenment Session to deactivate, let go of and disconnect us energetically from all of the morphogenic fields that energetically support and anchor us in either being diabetic or having genetic and hereditary tendencies to becoming diabetic.

The fifth transmission will be a Mega Healing and Enlightenment Session to activate, align and connect us to the morphogenic fields that energetically support, reinforce, anchor and enhance our ability, capability and capacity to have the most perfect possible blood sugar level – the blood sugar level that is aligned with our optimal health and well being on all levels.

The sixth transmission will be a Mega Healing and Enlightenment Session to align our past lives, parallel lives, genetic, epigenetic, mental and emotional programming to energetically support, reinforce, anchor and enhance our ability, capability and capacity to have the most perfect possible blood sugar level – the blood sugar level that is aligned with our optimal health and well being on all levels.

The seventh transmission will be a Mega Healing and Enlightenment session for clearing, transmuting, healing, releasing and dissolving the energetic weaknesses, imbalances, illness and disease states associated with diabetes and genetic dispositions to diabetes with ease and grace.
